

When Accuracy Matters

Call RGIS' Dedicated & Certified Auditors

Need:

One of the **largest 3PL providers in the US** was moving product and equipment into a new warehouse. The client reached out to **RGIS for experienced auditors** to maintain their inventory accuracy.

- Internal **scanners and protocol** had to be used in **cycle counts**
- Needed **2 shifts per day for 6 months** to perform cycle counts in the new warehouse

Solution:

RGIS **trained and certified staff** on the client's material handling equipment. Teams utilized the customer's scanners for continuity of data.

During the move, RGIS conducted **cycle counts** consistently by **staffing two shifts per day**. The teams performed cycle counts for a total of **6 months** to ensure inventory accuracy.

Auditors **recorded and updated** count information as well as product location data.

Results:

The client was able to move between warehouses **with no loss of inventory accuracy**. As one of the largest providers of 3PL services in the US, careful inventory management is a **necessity**.

- During the project, counted inventory was not in its final location and could move from day to day
- Certified RGIS employees were **dedicated to the project**
- Inventory **accuracy** was maintained
