

Let DM's Do Their Jobs

Let RGIS' Local Healthcare Supervisors Execute Your Annual Audits & Inspections

Need:

One of the leading pharmaceutical companies in the US, came to RGIS for on-site audits.

District managers were performing **annual inventories and inspections, inspection only, and initial inspection** events. This required **extensive time away** from regular job duties.

- **Paper and pen inventories** meant slow data processing and missing information
- Inventories were **expensive and inefficient**
- Auditors needed to **capture signatures securely**

Solution:

RGIS' **Healthcare Supervisors, trained on PDMA** in all 50 states and Puerto Rico were ready to jump into action.

New technology in the **RM hand-held devices** allowed for **improved data collection** and turnaround time.

Local Healthcare Supervisors completed all of the client's inventories. Working within local districts allowed RGIS to build relationships.

Results:

The client was able to **cut travel costs while improving accuracy**, data collection, and immediate data return for loading into their sample accountability system.

- **RGIS Schedulers** made audits convenient and flexible to fit the company and sales person's scheduling needs
- RGIS' technology securely enabled the collection of electronic signatures
- District managers could focus on **core job functions** rather than constant travel
- Data collection **turnaround time was decreased**, and accuracy increased
