

Rx Certified Inventory Auditors

RGIS knows the healthcare industry like you do

Need:

Internal quarterly pharmacy audits were taking staff away from their regular duties. **A large hospital** was looking to outsource the process to **save time and cost**.

Administrators worried about bringing **inexperienced auditors** into the pharmacy.

- Auditors needed to be trained and certified in **compliance requirements** and **hospital procedures**
- The client's **financial reporting needs** mandated custom reporting and data

Solution:

To **decrease post-inventory data reconciliation and reduce costs**, RGIS implemented a new inventory program.

By using **experienced pharmacy auditors** who received client specific training, inventories became **more efficient**.

RGIS auditors were **Rx certified** and **experienced** with pharmacy inventories.

RGIS applied **new technology to enhance reporting**. Adding sophisticated data collection and prompt data return.

Results:

The hospital related **cost savings and improved efficiency** after RGIS took over inventory. RGIS teams complete and **verified inventories** on a **quarterly basis**.

- Hospital administrators **could spend less time reconciling** counts
- **Financial deadlines were met** with ease thanks to custom reports
- RGIS District Managers worked closely with hospital administrators to **ensure exceptional training** and service
