

Upgrade with Confidence

RGIS works with you and your software company directly

Need:

One of the **top Long-term Care Pharmacies** in the United States had been a **long-time client of RGIS**.

When they decided to **upgrade their inventory management software**, they mobilized RGIS' inventory specialists.

- Perpetual level inventory had to be taken **without disrupting work schedules**
- The new inventory program had to **capture both financial and replenishment data** together

Solution:

Optional **variance reports** allowed the RGIS supervisor and the pharmacy director to review data.

Custom reporting allowed added visibility to top products.

RGIS met with the customer to **review** the desired **perpetual inventory outcomes**.

RGIS updated data capture programs to accommodate the new categories and **better define products**.

Results:

RGIS enabled the client to **roll out their software conversion** on schedule and with a smooth **transition period**.

RGIS teams visited select locations **after the transition**, helping to reconcile the **top 300 NDCs** through cycle counts. This ensured a functioning **replenishment system** was in place.

- Timely completion of a new inventory program **covering hundreds of locations**
- **Custom reports** and data collection was developed
- Increased **visibility** of the customer's **top products**
